PROJECTS

ATM Machine Simulation

C# - .NET Framework (In Progress)

Designed and implemented a fully functional ATM machine simulation using C# with an integrated GUI. This project features money deposits, withdrawals, and transfers, encapsulating real-world banking operations. Additionally, it securely handles user data, including first and last name, PINs, and card numbers. Throughout this project I demonstrated my perseverance in creating secure, user-friendly applications with real-world applicability, emphasizing both functionality and user experience.

FSW TECH

JavaScript - HTML - CSS (In Progress)

Showcased a dynamic shopping cart, real-time total calculations and intuitive product quantity control. Leveraging in-depth tutorials, I have deepened my understanding of complex functionalities using HTML, CSS, and JavaScript.

NuCampApp

JavaScript - React Native - Redux (Bootcamp Project)

Developed a multi-page mobile app with React Native, Redux, and JavaScript, emphasizing intuitive UI, efficient state management, and seamless navigation. Final project of the NuCamp Front End course.

WORK EXPERIENCE

Geek Squad - Consulting Agent

July 2023 - Present

Provided technical support and solutions to customers, diagnosing, and repairing a wide range of electronic devices while ensuring high level of customer satisfaction.

Coherent - Operator Technician

April 2022 - December 2022

Beyond handling semiconductors, I applied my technical skills to troubleshoot machinery, ensuring optimal production uptime and maintaining the highest standards of product delivery.

United States Navy - ABH3 (AW/SW)

October 2018 - January 2022

Aviation Boatswain Mate Handler Third Class Petty Officer (Air Warfare/Surface Warfare) - I manage and maintain aircraft launch and recovery equipment, demonstrating leadership and precision in high-pressure situations. My honorable discharge stands as a testament to my dedication, discipline, and exemplary service to my country.
